

## **Series MW**

### **Mobile Ozonated Water Wash**

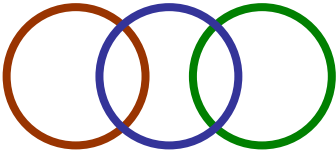

#### **Delivers**

- Effective and ecologically friendly defence against harmful contaminants such as Pseudomonas and Listeria
- Real alternative to existing chlorine-based procedures
- Practical solution to the persistent problem of bacterial and fungal incursion

#### **Description**

- A mobile system that effectively kills bacteria, viruses, parasites and moulds when used as a sanitising wash down on process equipment and working surfaces as well as on produce itself
- All stainless steel package that delivers a high concentration of absorbed ozone with onboard pump and injector for efficient ozone mass transfer
- Environmentally friendly: no chemical residues to deal with
- Simply connect process water in and get high concentration ozonated water out
- Complete with hose and spray wand(s)

## Specification

<b>Output:</b>	Single hose model: 5 litres/minute Dual hose model: 10 litres/minute
<b>Power Supply requirement:</b>	230VAC 50Hz (single phase)
<b>Water Supply requirement:</b>	Mains drinking water, max 12°C, filtered to 50 micr on, Pressure: minimum 2 Bar, maximum 3 Bar
<b>Compressed Air Supply requirement:</b>	140 litres/minute, 6 Bar, -40°C Dew point
<b>Casing:</b>	Stainless steel
<b>Safety Features:</b>	Over temperature sensor Low water flow sensor Low feed gas flow sensor Internal circuit breaker
<b>Documentation:</b>	Full operating manuals
